

# Round Table: Digital Health Application Frameworks for the Nordics with a focus on DiGA

*What is needed to apply digital health solutions in practice?  
What kind of application frameworks are available and how do they differ?*

The IN-4-AHA consortium would like to invite you to a discussion about the best practices and challenges in bringing digital devices to the Nordic market. The event is planned in two sessions. First, the experiences from Germany and the UK, and thereafter, a round-table discussion between 15 stakeholder representatives from Nordic countries. The event takes place via Zoom, link is automatically sent to registered participants.

## Rationale for the round table

To be able to provide high level healthcare for the ageing population, we need to start using more digital solutions. These digital solutions need to have proven positive effect on the healthcare, both in the medical and economic aspect. Although all the Nordic countries have a national universal healthcare system in place, the procedure to get medical devices that can be used by patients listed as the reimbursed treatments varies from country to country. We will discuss the current reimbursement regulations from the perspectives of regulative authority, entrepreneurs, as well as from the users. Through collaboration, the fractioned Nordic market will be increasingly attractive to healthcare innovators.

## AGENDA

12:00 – 13:30

### Session I: Introduction, lessons from previous round tables in the Nordics and Baltics.

Welcome by **Erik Forsberg, EIT Health Scandinavia**

Welcome by **Piret Hirv, Tehnopol**, Project Manager, the IN-4-AHA consortium,

Lessons from Previous roundtables in the Nordics on acceralio innovation in healthcare, **Erik Forsberg, EIT Health Scandinavia**

Experiences from Germany on DiGA, **Henrik Matthies, Managing Director, Federal Ministry of Health, Health Innovation Hub**

Experiences from the UK on bringing digital health applications to market, **Tim Andrews, ORCHA**

13:45 – 15:15

### Session II: Round Table: Digital Health Application Frameworks for the Nordics with a focus on DiGA
