

Potential impact of data regulations on service provision in health and care

What will the new EC regulations such as the [Data Governance Act](#) and [Data Act](#) bring for the ecosystem of active and healthy aging?

This online webinar intends to explore answers to this question by sharing information on the acts and discussing the potential effects with stakeholders.

We invite you to register and take part if you:

- Are promoting health and care services for the population 65+
- Are interested in digital innovation and data governance in health and social care
