

# IN-4-AHA: outputs and achievements

The **IN-4-AHA project** is in its final months. An extensive body of work has been developed in the last year and a half, aimed at delivering theoretical and practical guidelines for the community when it comes to **implementing** and **upscaling innovations** in **active and healthy ageing**.

With this objective in mind, the IN-4-AHA consortium has selected two outputs with great potential in advising companies, innovators, and overall service providers, in their scaling-up journey. **Data management** and **long-term investment strategies** are common challenges for stakeholders in this field and will be addressed from a practical point of view at this event.

See our website for the updated outputs list, [here](#).

## AGENDA

11:00 – 11:10

### Welcome

**Diogo Videira, Porto4Ageing** [University of Porto]

**Liina Joller-Vahter, EIT Health Scandinavia**, Introduction: challenges in scaling-up solutions in AHA

11:10 – 11:50

### Notable IN-4-AHA outputs

**Hille Hinsberg, Proud Engineers**, Data Governance Guidebook [available [here](#)]

**Andreas Palm, Civitta**, Long-term investment plan [available soon]

11:50 – 12:00

### Q&A

Moderated by **Diogo Videira, Porto4Ageing** [University of Porto]
